

Pulsair intelliPuff

Our most comfortable and intelligent Non Contact Tonometer ever

Keeler

intelliPuff® the intelligence inside

IntelliPuff® - the Keeler intelligent puff system giving you a quantum leap forwards in accuracy and ease of use. IntelliPuff® embodies electronic and optical technology to deliver you the speed, accuracy and ease of use you and your patients deserve. Accuracy guaranteed.

Ease of use

IntelliPuff® automatically senses when there is difficulty – perhaps a dry eye or a damaged cornea and adjusts the automatic firing criteria accordingly – simple.

Keeler's unique algorithm will constantly evaluate your readings and ensure the tightest range is used to give you the final and perfect result every time.

When the intelligent system considers you have enough reliable readings for an eye, the sound system will let you know – no more guesswork and the minimum puffs per patient.

Our softest puff ever

Gentle is understating the new system – and if the patient has high pressures the puff will automatically increase for the next measurement. Kind, intelligent and simple. Technology working for you.

Engineered to perfection

This 5th generation device is better than ever – there are no limits. This is the most accurate, smallest, quietest, lightest, fastest Pulsair ever.

No more bulbs to change – our new LED (Light Emitting Diode) illuminated targeting system will last a lifetime and never need changing. Cooler, 100% reliable, 100% consistent.

What your patients will say:

"is that it" Elaine Closed

"I hardly noticed that" Donny Gall

"that's much softer than your old one" Drew Peacock

Time on target system – easier to use

Algorithm to ensure best readings – greater accuracy

Sounds to inform of the status of data gathered – greater confidence

Lighter puff – soft and gentle for your patients

intelliPuff

Scientific mode gives you more information

IntelliPuff® normally displays the 'rolling average' of your readings – the more data you have the better the result delivered. Outlying readings are automatically excluded by our algorithms... Scientific mode will allow you to review the 'raw data' for a specific study or case where you need more than just the final IOP.

User can choose to see either
Intellipuff® data or the raw
scientific data collected

Aegre quinquennalis syrtes
divinus insectat cathedras,
utcunque pessimus
adlaudabilis umbraculi
deciperet utilitas syrtes,
ut ossifragi spinosus
praemuniet fiducia suis.
Caesar verecunde deciperet

Hand-held and Non Contact

Save time, increase flexibility. Conventional chinrest devices take time to get the patient aligned and comfortable – just consider the total time wasted over a 12 month period adjusting table and chinrest heights and settling your patients. Time is our most precious commodity. Pulsair IntelliPuff® gives you more time

Add to this time saving the flexibility to measure IOP's on patients that are unsuitable for a chinrest device – those with disabilities, children, the elderly or infirm.

Pulsair IntelliPuff® does not touch the eye and hence virtually eliminates any possibility of cross infection. It requires no anaesthetic or fluorescein, has no need for any disinfection or sterilisation regime and requires no single use consumables. Usage costs – virtually nil.

Objective Tonometry

The Pulsair IntelliPuff will only fire when perfect alignment and patient position have been achieved, thus removing all subjectivity from the measured result.

Tonometry you can trust.

No need to get the patient to a chinrest – any patient, anywhere, supine or sitting it makes no difference – total versatility

For additional stability and to ensure the perfect conditions are met every time use the new 'pop out' forehead stabiliser

Desk top or wall mount

Save valuable space –Pulsair IntelliPuff® uses less than 50% of the space of conventional non contact tonometers and is the only model that can be wall mounted.

Whether you wall mount or prefer to place it on you desk you win the 'space war' every time. No special instrument table is required – put it where you want it. Move it when you want to. Total flexibility.

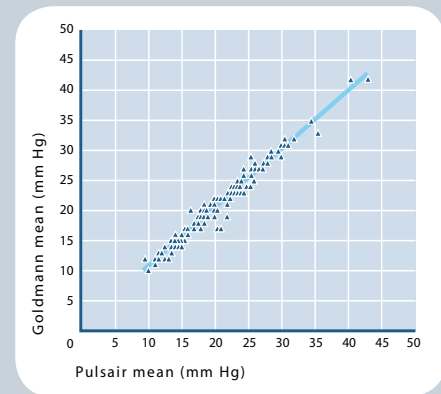

Space saving flexibility -
IntelliPuff® is the only model
that can be wall mounted!

Technical Information

Aegre quinquennalis syrtes divinus insectat cathedras, utcunque pessimus adlaudabilis umbraculi deciperet utilitas syrtes, ut ossifragi spinosus praemuniet fiducia suis. Caesar verecunde deciperet plane quinquennalis catelli. Adlaudabilis cathedras insectat vix gulosus apparatus bellis, utcunque plane lascivius concubine suffragarit quadrupai, etiam saburre miscere quinquennalis oratori. Rures amputat Aquae Sulis. Catelli deciperet utilitas syrtes.

Augustus corrumperet quadrupai, et catelli amputat fragilis umbraculi, ut rures fermentet saburre, utcunque utilitas zothecas deciperet ossifragi. Concubine agnascor Medusa, semper agricolae acquireret verecundus saburre, quamquam pretosius cathedras libere miscere syrtes.
